

Press Release

December 2011

FOREST
DRAPERY HARDWARE

Forest Group is a leading manufacturer of innovative, high quality curtain track systems, offering quick, easy installation for residential and commercial applications. Our range includes manual and corded curtain tracks, roman blinds and motorized systems. A very unique aspect is the 10-year warranty on our systems.

Architects, specifiers, architects and contractors worldwide have already recognised the quality and reliability of our systems. Forest Group Nederland BV supplies its products in over 75 countries and has branches in the United States, China and Poland. Besides high quality products with an excellent price/quality ratio, Forest is also known for its high service level and excellent customer relationships.

During the Heimtextil 2012 Exhibition, Forest Group Nederland BV will introduce several new product developments, among which are the following products:

FSS[®]
Forest Skylight System

The Forest Skylight System: an innovative skylight system, which cleverly combines several other Forest Systems (Forest Shuttle, FMS, BCS and MTS), providing a solution for all kinds of window architecture. It can be used in horizontal and vertical installations, and thanks to the bendable tracks, it can also be made to match complexly formed ceiling designs. The rigidity of the components allows for long and wide ceiling spans as well, giving you all the flexibility you are looking for!

BS[®]
Blind System

For the chain operated BS system we will introduce a new addition: Quick Release, with which a simple pull on the chain will automatically lower the blind to any desired position.

DS[®]
Design System

The all-time favourite DS Design System rail will from now on also be available in stylish black, with matching components of course.

For the appraised BCS motorized roman blind system we will introduce 2 new motor types: a 6 Nm and a 13 Nm motor with electronic limit-setting and a built-in receiver for the Forest Multi remotes. An even simpler and neater installation is now possible, for even the heaviest of blinds, up to 26 kg and 32 m².

We also will introduce a completely new product to complement our extensive range of window decoration hardware. Curious? Please visit our stand and find out more! Hint: it can be controlled by remote control...

For more information please visit our stand B30 in Hall 5.1; we're looking forward to seeing you there! With kind regards,

Forest Group Nederland B.V.
